PROFILE

Data science and analytics professional with a background in Telecommunications and Information Engineering and experience across digital services, operational analytics, research, and applied machine learning. Skilled in Python, SQL, exploratory data analysis, statistical analysis, visualization, and predictive modelling. I turn complex data into understandable findings that support decisions across industries, including finance, technology, and public services. Currently pursuing a Master of Data Science.

TECHNICAL EXPERTISE

Programming & data · Python (Pandas, NumPy, Matplotlib), SQL, Jupyter, Excel, data cleaning, ETL, validation

Analytics & visualization · EDA, statistical analysis, KPI reporting, Power BI, Tableau, dashboards

Machine learning · Classification, regression, clustering, model evaluation, forecasting, time-series analysis

Other tools & methods · Git/GitHub, Linux, OCR, document extraction, reproducible analysis, responsible data handling

PROFESSIONAL EXPERIENCE

Data Science Consultant

Young Entrepreneurs Network (YEN) Africa | Oct 2025 – Present

- Analyze sales, inventory, customer and training-conversion data to identify trends, anomalies and operational opportunities.
- Clean, reconcile and validate datasets; maintain KPI reporting to support commercial decisions.
- Explore ways to streamline manual reporting and improve access to business information.

Digital Services & Data Analysis

eCitizen / State Department of Immigration | Aug 2024 – Present · Data responsibilities from Jan 2026

- Analyze operational and service data, including logs and performance indicators, to investigate trends and recurring issues.
- Prepare and validate datasets; produce KPI reports and document findings for service stakeholders.
- Contribute to cross-functional digital-service work and privacy-conscious handling of operational information.

Open-Source Contributor — OCR & Data Analysis

Fedora Docling / Outreachy contribution work | Jan 2026 – Oct 2026

- Explored Python OCR workflows for extracting structured information from multilingual scanned documents.
- Compared Tesseract, EasyOCR and RapidOCR using Swahili and French material; documented evaluation and error analysis.

ICT / Telecom Intern

Unitel Kenya | Aug 2019 – Mar 2021

- Supported network performance monitoring, troubleshooting, technical reporting and documentation.

SELECTED PROJECTS

Financial Guardian AI — Unmasking Hidden Debt Webs

Financial risk analytics | Group project

- Explored hidden borrowing relationships and risk indicators through data preparation, exploratory analysis and visualization.
- GitHub: github.com/Uxer-Janine/Financial-Guardian-AI-Unmasking-Hidden-Debt-Webs.

Multilingual OCR Data Processing & Evaluation

Document intelligence | Python, Jupyter, OCR

- Compared OCR approaches on Swahili and French documents through preprocessing, output analysis and documented experiments.
- GitHub: github.com/Uxer-Janine/outreachy-docling-task

Renewable Energy Forecasting

Time-series analysis | SARIMAX

- Analyzed Kenyan electricity trends and explored demand forecasting with supporting visualizations and reproducible documentation.
- GitHub: github.com/Uxer-Janine/Renewable-Energy-Forecasting

EDUCATION

Master of Data Science | Open University of Kenya

Jan 2026 – Present

BSc Telecommunications & Information Engineering | Jomo Kenyatta University of Agriculture and Technology

Sep 2017 – Jun 2023

PROFESSIONAL TRAINING

- Data Analyst Track | Maven Analytics · Ongoing (2026)
- Data Science Bootcamp | Moringa School · 2025
- Cisco Cyber Threat Management | USIU · 2025
- Open-Source Software with Responsible AI | AFRALTI · 2024
- Women Techsters Fellowship, Product Design | Tech4Dev · 2023–2024

PROFESSIONAL STRENGTHS

Analytical problem solving · Data quality · Research and documentation · Stakeholder communication · Cross-functional collaboration · Responsible data use
